

Procedures for decontamination

Shoes/boots:

- Thoroughly remove debris and dirt from shoes with a soft bristled brush into a plastic bag.
- 'Rinse' shoes with water and a sponge, scrubbing the entire shoe trying not to soak the upper shoe material.
- Rinse the sole of the boot more thoroughly.
- Wet sponge in already prepared diluted Lysol IC Quaternary Disinfectant Cleaner (1 ounce per gallon solution) and clean entire shoe. Use Lysol® Disinfecting Wipes can also be used.
- In a container or tub, submerge the soles of the shoes (rubber bottom). Let sit for 10 minutes.
- After 10 minutes remove shoes and thoroughly rinse with clean sponge and water. Let dry.

Clothing:

- Wash in hot water with detergent.
- Rise in hot water.
- Dry in dryer under a hot setting.

Cameras/Electronic equipment, glasses, watches other hard surface items:

- Dampen with water; wipe down with dry paper towel to remove debris.
- Wash with antibacterial soap and water, where appropriate.
- Use Lysol® Disinfecting Wipes thoroughly on the item.
- Rinse with damp paper towel and let air dry.
